DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13-19, drawn to isolated eIF-4AIII proteins, proteolytic fragments and fusion proteins, classified in class 530, subclass 350.
- II. Claims 20-22, drawn to monoclonal antibodies, classified in class ⁵³⁰~~350~~, subclass 587.1.
- III. Claims 23-26, drawn to methods of identifying potential drugs, classified in class 435, subclass 70.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are separate and distinct from each other, as they comprise differing biochemical and physical entities having differing properties and uses. Invention I is drawn to proteins and protein fragments, whereas Invention II is drawn to antibodies.

Inventions I and II are separate and distinct from Invention III as the substances of Inventions I and II cannot be used in the methods of Invention III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1645

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
